# *Furgeson and the Unified Field Theory*

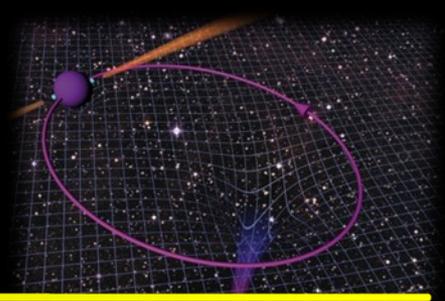

## DAY 1

In the beginning there was Aristotle  
And objects at rest tended to remain at rest  
And objects in motion tended to come to rest  
And God saw that it was boring, although very  
restful.

*Black holes are like  
teenagers: they let you  
know when they grow  
up (A. Merloni)*

## DAY 2

Then God created Newton  
And objects at rest tended to remain at rest  
And objects in motion tended to remain in motion  
And energy was conserved, and momentum was  
conserved,  
And matter was conserved  
And God saw that it was conservative.

*The ISM is a  
nightmare!* (L. Mayer)

## DAY 3

Then God created Einstein  
And everything was relative  
And fast things became short  
And straight things became curved  
And the universe was filled with inertial frames  
And God saw that it was relatively general  
but some of it was especially relative.

*... and thanks to  
Faraday,  
everything keeps  
rotating ...*

## DAY 4

Then Go

And there was

And the principle was quantum

And all things were quantified

Some were still relative

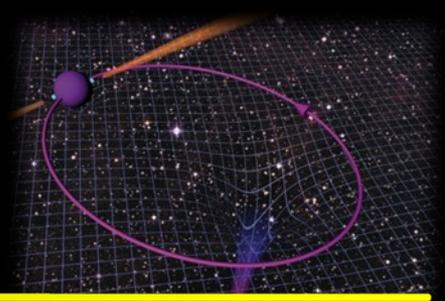

But it was confusing.

*One mans noise is  
another mans data.  
(R. Wijers)*

*Unfortunately, some  
planets were detected.  
(H. Klahr)*

## DAY 7

Then God was going to create Furgeson  
And Furgeson would have unified  
And he would have fielded a theory  
And all would have been one...  
But it was the seventh day  
And God rested  
at rest tend to remain at rest.

*We really  
need  
the SKA!*
